PROFESSIONAL SUMMARY

Full Stack Developer skilled in building production-ready web apps using React, Next.js, Node.js, Express, Django, PostgreSQL, MongoDB, and cloud tools. Delivered 6+ real-world projects including Library System, AI Interview Platform, E-Commerce SaaS, Patient System, Safety App, and Stock Dashboard. Proficient in frontend architecture, backend APIs, authentication, dashboards, and cloud integration.

TECHNICAL SKILLS

Languages : JavaScript, TypeScript, Python, Java (Basic)
Frontend : React.js, Next.js, TailwindCSS, HTML, CSS, ShadCN
Backend : Node.js, Express.js, Django REST Framework, REST APIs, Sessions/Auth
Databases : PostgreSQL, MongoDB, MySQL, SQLite, NeonDB
Cloud & Tools : AWS (EC2, S3), Docker (Basic), Firebase, Redis, ImageKit, Git, GitHub, CI/CD (Basic)

INTERNSHIP EXPERIENCE

Python Programming Intern — YBI Foundation Jul 2024 | Remote

- Developed automation scripts for data processing & file conversion.
- Refactored modular code performance by 20%; used Git & GitHub for workflow.

Full Stack Development Intern - Codec Technologies | Jan 2026 – Present

- Working with React, HTML, CSS, JavaScript to build responsive user interfaces
 - Developing REST APIs using Node.js, Express & MongoDB
 - Implementing authentication, CRUD operations, and Git/GitHub workflows
-

PROJECTS

ReadFlow — University Library Management System

[GitHub](#)

Tech: Next.js, TypeScript, PostgreSQL, Redis, Drizzle ORM, Auth.js, ImageKit

- Deployed full-stack system with authentication, admin dashboard & 12+ REST APIs using Next.js, PostgreSQL & Drizzle ORM.
- Enhanced performance by 40% with Redis caching and boosted DB queries.

VoxInterview AI – AI Voice Interview Platform

[GitHub](#)

Tech: Next.js, Firebase, Gemini AI, VY Voice SDK

- Developed real-time voice interviewer using Gemini AI, Firebase & VY SDK with 95% transcript accuracy.
- Built dashboards for interview history, analytics & session storage.

I Am Safe – Women's Safety Android App

[GitHub](#)

Tech: Android Studio, Java, Google Maps API, SQLite

- Implemented SOS alerts with 3-sec live GPS updates, nearby hospitals, and route tracking.
- Designed offline emergency storage with SQLite & background services.

FinSight AI – Live Stock Dashboard

[GitHub](#)

Tech: Next.js, AlphaVantage API

- Created stock dashboard with live charts & watchlist using AlphaVantage API.
- Accelerated API response time by 45% using caching and refined data-fetching workflows.

MediLink – Patient Management System

[GitHub](#)

Tech: Next.js, Twilio

- Constructed patient & admin dashboards with role-based authentication using Next.js.
- Integrated Twilio API to send automated SMS appointment reminders.

ShopSphere – Multi-Vendor E-Commerce SaaS

[GitHub](#)

Tech: Node.js, Express.js, Microservices, MongoDB, ImageKit

- Executed vendor & product microservices with 20+ API endpoints using Node.js & MongoDB.
 - Upgraded server performance by 35% using modular architecture & ImageKit CDN.
-

CERTIFICATIONS

- Master Full Stack Web Development With Games and Application - Udemy(2025) [Certificate](#)
 - Meta Front-End Developer Professional Certificate — Coursera (2025) [Certificate](#)
 - JavaScript Algorithms & Data Structures — freeCodeCamp (2025) [Certificate](#)
 - Career Essentials in Software Development by Microsoft and LinkedIn (2024) [Certificate](#)
 - Introduction to Career Skills in Software Development - LinkedIn(2024) [Certificate](#)
-

EDUCATION

Bachelor of Computer Applications (BCA) – Alva's College (2020–2023) | CGPA: 8.05
